

CLASS DIAGRAM

NOTE

The databases are only used to store data; therefore, they are excluded in the class diagram to prevent undesired complication.

+FindShare(int sharecode): Get all shares that have matching share code

+GetSharesToBuy(List<Shares> shares, double price): Get all shares that have price equal or lower than the request price

+GetSharesAtAPrice(List<Shares> shares, double price): Get all shares that have price equal to the request price
